

# Welcome to ADT's Safer City

The future of safety is in your home, business, rideshare and on-the-go.

## Safer at Home

Now you can choose how your ADT smart home security system is installed. Do it yourself with the new ADT Self Setup, or let ADT's experienced technicians install it for you on your schedule.

Now you can get peace of mind from ADT with the intelligence of Google for a safer, smarter home. With cameras that are so smart, they can tell the difference between a person, an animal, or a vehicle, so you get alerts about the things that matter. And it can be accessed from the ADT+ app, where you can arm your system and check in on your home from virtually anywhere\*.

Solar

With ADT Solar, we help you take more control over your home's energy with solar panels and battery backup. Get peace of mind knowing that ADT is there to help keep your home powered with cleaner energy to secure a brighter future.

## Safer at Work

At your business, ADT never clocks out. Our EvoGuard™ intelligent autonomous security solutions - including humanoid robots and drones - are your eyes and ears 24/7, helping to protect what matters most.

## Safer On-The-Go

With SoSecure, you can easily keep an eye out for loved ones in real-time, discreetly contact ADT if you feel unsafe, or tell us when you want us to check in on you.

Companies can use SoSecure PRO to enhance workplace safety for employees on-site and on-the-go. Having ADT's time-trusted response at a swipe, tap, or whisper gives employees peace of mind and helps protect employers' greatest assets.

Backed by Ford and ADT, Canopy is on a mission to end vehicle theft and revolutionize automotive security with cutting-edge technology. Canopy will offer industry-first, multi-sensor security systems for vehicles with professional monitoring.

ADT has brought its mobile safety platform to invisawear's unique line of lifestyle-inspired safety devices. ADT also powers invisawear's companion app, allowing users who feel unsafe to discreetly connect with ADT.

ADT partnered with DoorDash to power DoorDash's in-app safety toolkit called SafeDash, allowing Dashers to quickly and easily request professional help by voice or text and receive emergency services to their location anytime they feel unsafe.

ADT has worked with Lyft to help protect people with Emergency Help, a safety feature powered by ADT that discreetly connects Lyft riders and drivers to an ADT professional monitoring agent in the event they feel uncomfortable or need emergency response.

ADT has partnered with Uber to integrate ADT mobile safety solutions into the Uber app for riders and drivers. Uber users in the United States can now get live help, via phone or text, from ADT.
