

INTRODUCING ADT Self Setup

In February, ADT will introduce ADT Self Setup - a new DIY solution that helps you connect and protect what matters most. ADT Self Setup systems include life safety and intrusion protection from ADT compatible Google Nest products such as cameras, doorbells and thermostats. And you can set it all up at your own convenience, no heavy-duty tools required.

Get peace of mind from ADT now with the intelligence of Google for a safe, smart home.

With cameras that are so smart, they can tell the difference between a person, an animal, a vehicle – or with the Nest Doorbell, even a package!

Easily install the ADT Self Setup system at your convenience with common tools.

And if you need help, ADT can provide virtual assistance along the way.

ADT is there for you 24/7 with award-winning professional monitoring.

ADT SMART Monitoring with Video Verification* helps police respond faster, so you can get help sooner, when every second counts.

Build a system that fits your home right now, and add on as your needs change.

Your ADT Self Setup system easily moves wherever life takes you.

*vs. unverified alarms. Requires purchase of Nest Camera and interactive monitoring services plan.
